MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(In thousands of U.S. dollars, except per share data)

Note 1. The Company and Summary of Significant Accounting Policies

Basis of Presentation

The interim consolidated financial statements contained herein include the accounts of Mercer International Inc. (“Mercer Inc.”) and all of its subsidiaries (collectively the “Company”). The Company’s shares of common stock are quoted and listed for trading on both the NASDAQ Global Market and the Toronto Stock Exchange.

The interim consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the U.S. Securities and Exchange Commission (the “SEC”). The year-end Consolidated Balance Sheet data was derived from audited financial statements. The footnote disclosure included herein has been prepared in accordance with accounting principles generally accepted for interim financial statements in the United States (“GAAP”). The interim consolidated financial statements should be read together with the audited consolidated financial statements and accompanying notes included in the Company’s latest annual report on Form 10-K for the fiscal year ended December 31, 2014. In the opinion of the Company, the unaudited interim consolidated financial statements contained herein contain all adjustments necessary for a fair statement of the results of the interim periods included. The results for the periods included herein may not be indicative of the results for the entire year.

The Company has three pulp mills that are aggregated into one reportable business segment, market pulp. Accordingly, the results presented are those of the reportable business segment.

In these interim consolidated financial statements, unless otherwise indicated, all amounts are expressed in United States dollars (“U.S. dollars” or “\$”). The symbol “€” refers to euros and the symbol “C\$” refers to Canadian dollars.

Use of Estimates

Preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Significant management judgment is required in determining the accounting for, among other things, pension and other post-retirement benefit obligations, deferred income taxes (valuation allowance), depreciation and amortization, future cash flows associated with impairment testing for long-lived assets, intercompany loans of a long-term investment nature, legal liabilities and contingencies. Actual results could differ materially from these estimates, and changes in these estimates are recorded when known.

New Accounting Standards

In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update 2014-09, Revenue Recognition – Revenue from Contracts with Customers (“ASU 2014-09”) that requires companies to recognize revenue when a customer obtains control rather than when companies have transferred substantially all risks and rewards of a good or service. This update is effective for annual reporting periods beginning on or after December 15, 2016 and interim periods therein and requires expanded disclosures. The Company is currently assessing the impact, if any, the adoption of ASU 2014-09 will have on its consolidated financial statements.

In April 2015, the Financial Accounting Standards Board issued Accounting Standards Update 2015-03, Simplifying the Presentation of Debt Issuance Costs (“ASU 2015-03”) which requires debt issuance costs to be presented in the balance sheet as a direct deduction from the carrying value of the associated debt liability, consistent with the presentation of a debt discount. This standard is effective for financial statements issued for fiscal years beginning after December 15, 2015. The Company is currently assessing the impact the adoption of ASU 2015-03 will have on its consolidated financial statements.

MERCER INTERNATIONAL INC.

Spare parts and other	46,628	48,609
	<u>\$ 141,196</u>	<u>\$ 146,576</u>

Note 3. Debt

Debt consists of the following:

	June 30, 2015	December 31, 2014
2019 Senior Notes, unsecured (a)	\$ 250,000	\$ 250,000
2022 Senior Notes, unsecured (a)	400,000	400,000
Payment-in-kind note (b)	-	12,101
Revolving credit facilities		
€75.0 million (c)	25,650	25,412
C\$40.0 million (d)	7,229	-
€25.0 million (e)	-	-
€5.0 million (f)	-	-
	<u>682,879</u>	<u>687,513</u>
Less: current portion	-	(12,101)
Debt, less current portion	<u>\$ 682,879</u>	<u>\$ 675,412</u>

As at June 30, 2015, the maturities of debt are as follows:

Matures	Amount
2015	\$ -
2016	-
2017	-
2018	-
2019	282,879
Thereafter	400,000
	<u>\$ 682,879</u>

Certain of the Company's debt instruments were issued under agreements which, among other things, may limit its ability and the ability of its subsidiaries to make certain payments, including dividends. These limitations are subject to specific exceptions. As at June 30, 2015, the Company is in compliance with the terms of its debt agreements.

- (a) On November 26, 2014, the Company completed a private offering of \$250,000 in aggregate principal amount of 7.00% senior notes which mature on December 1, 2019 ("2019 Senior Notes") and \$400,000 in aggregate principal amount of 7.75% senior notes which mature on December 1, 2022 ("2022 Senior Notes" and collectively with the 2019 Senior Notes, the "Senior Notes"). The Senior Notes were issued at a price of 100% of their principal amount.

MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(In thousands of U.S. dollars, except per share data)

Note 3. Debt (continued)

The Senior Notes are general unsecured senior obligations of the Company. They rank equal in right of payment with all existing and future unsecured senior indebtedness of the Company and are senior in right of payment to any current or future subordinated indebtedness of the Company. The Senior Notes are effectively junior in right of payment to all existing and future secured indebtedness, to the extent of the assets securing such indebtedness, and all indebtedness and liabilities of the Company's subsidiaries.

The Company may redeem all or a part of the Senior Notes, upon not less than 30 days' or more than 60 days' notice, at the redemption prices (expressed as percentages of principal amount) discussed below, plus accrued and unpaid interest to (but not including) the applicable redemption date. The 2019 Senior Notes redemption prices are equal to 103.500% for the twelve month period beginning on December 1, 2016, 101.750% for the twelve month period beginning on December 1, 2017, and 100.000% beginning on December 1, 2018 and at any time thereafter. The 2022 Senior Notes redemption prices are equal to 105.813% for the twelve month period beginning on December 1, 2017, 103.875% for the twelve month period beginning on December 1, 2018, 101.938% for the twelve month period beginning on December 1, 2019, and 100.000% beginning on December 1, 2020 and at any time thereafter.

- (b) A €10.0 million payment-in-kind note due to the former noncontrolling shareholder of the Stendal mill which the Company redeemed on April 20, 2015 for a cash payment of €10.0 million (\$10,763).
- (c) A €75.0 million revolving credit facility at the Stendal mill that matures in October 2019. Borrowings under the facility are collateralized by the mill's inventory and receivables and bear interest at Euribor plus 3.50%. As at June 30, 2015, €23.0 million (\$25,650) of this facility was drawn and was accruing interest at a rate of 3.50%, and approximately €52.0 million (\$57,990) was available.
- (d) A C\$40.0 million revolving credit facility at the Celgar mill that matures in May 2019. Borrowings under the facility are collateralized by the mill's inventory and receivables and are restricted by a borrowing base calculated on the mill's inventory and receivables. Canadian dollar denominated amounts bear interest at bankers acceptance plus 1.50% or Canadian prime. U.S. dollar denominated amounts bear interest at LIBOR plus 1.50% or U.S. base. As at June 30, 2015, approximately C\$9.0 million (\$7,229) of this facility was drawn and was accruing interest at a rate of 2.49%, C\$1.7 million (\$1,362) was supporting letters of credit and approximately C\$29.3 million (\$23,476) was available.
- (e) A €25.0 million revolving credit facility at the Rosenthal mill that matures in October 2016. Borrowings under the facility are collateralized by the mill's inventory and receivables and bear interest at Euribor plus 3.50%. As at June 30, 2015, approximately €0.4 million (\$446) of this facility was supporting bank guarantees leaving approximately €24.6 million (\$27,434) available.
- (f) A €5.0 million revolving credit facility at the Rosenthal mill that matures in December 2015. Borrowings under this facility bear interest at the rate of the three-month Euribor plus 3.50% and are secured by certain land at the Rosenthal mill. As at June 30, 2015 approximately €1.3 million (\$1,395) of this facility was supporting bank guarantees leaving approximately €3.7 million (\$4,181) available.

MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(In thousands of U.S. dollars, except per share data)

Note 4. Pension and Other Post-Retirement Benefit Obligations

Defined Benefit Plans

Included in pension and other post-retirement benefit obligations are amounts related to the Company's Celgar and Rosenthal mills. The largest component of this obligation is with respect to the Celgar mill which maintains a defined benefit pension plan and post-retirement benefit plans for certain employees (the "Celgar Defined Benefit Plans").

Pension benefits are based on employees' earnings and years of service. The Celgar Defined Benefit Plans are funded by contributions from the Company based on actuarial estimates and statutory requirements. Pension contributions during the three and six month periods ended June 30, 2015 totaled \$438 and \$913, respectively (2014 – \$617 and \$1,226).

The components of the net periodic benefit costs relating to the Celgar Defined Benefit Plans for the three and six month periods ended June 30, 2015 and 2014 were as follows:

	Three Months Ended June 30,			
	2015		2014	
	Pension Benefits	Post-Retirement Benefits	Pension Benefits	Post-Retirement Benefits
Service cost	\$ 32	\$ 208	\$ 31	\$ 184
Interest cost	276	172	465	315
Expected return on plan assets	(534)	-	(563)	-
Amortization of unrecognized items	229	2	199	(3)
Net periodic benefit cost	<u>\$ 3</u>	<u>\$ 382</u>	<u>\$ 132</u>	<u>\$ 496</u>

	Six Months Ended June 30,			
	2015		2014	
	Pension Benefits	Post-Retirement Benefits	Pension Benefits	Post-Retirement Benefits
Service cost	\$ 63	\$ 413	\$ 61	\$ 365
Interest cost	724	498	924	626
Expected return on plan assets	(1,063)	-	(1,120)	-
Amortization of unrecognized items	455	4	396	(6)
Net periodic benefit cost	<u>\$ 179</u>	<u>\$ 915</u>	<u>\$ 261</u>	<u>\$ 985</u>

Defined Contribution Plan

Effective December 31, 2008, the Celgar Defined Benefit Plans were closed to new members. In addition, the defined benefit service accrual ceased on December 31, 2008, and members began to receive pension benefits, at a fixed contractual rate, under a new defined contribution plan effective January 1, 2009. During the three and six month periods ended June 30, 2015, the Company made contributions of \$179 and \$348, respectively (2014 – \$184 and \$399), to this plan.

Multiemployer Plan

The Company participates in a multiemployer plan for the hourly-paid employees at the Celgar mill. The contributions to the plan are determined based on a percentage of pensionable earnings pursuant to a collective bargaining agreement. The Company has no current or future contribution obligations in excess of the contractual contributions. Contributions during the three and six month periods ended June 30, 2015 totaled \$399 and \$850, respectively (2014 – \$514 and \$1,021).

MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(In thousands of U.S. dollars, except per share data)

Note 5. Stock-Based Compensation

In June 2010, the Company adopted a stock incentive plan (the “2010 Plan”) which provides for options, restricted stock rights, restricted shares, performance shares, performance share units (“PSUs”) and stock appreciation rights to be awarded to employees, consultants and non-employee directors. During the six months ended June 30, 2015, there were no issued and outstanding restricted stock rights, performance shares or stock appreciation rights. As at June 30, 2015, after factoring in all allocated shares, there remain approximately 2.1 million common shares available for grant.

PSUs

PSUs comprise rights to receive common shares at a future date that are contingent on the Company and the grantee achieving certain performance objectives. The performance objective periods are generally three years.

For the three and six month periods ended June 30, 2015, the Company recognized an expense of \$596 and \$1,097, respectively, related to PSUs (2014 – \$473 and \$54).

The following table summarizes PSU activity during the period:

	<u>Number of PSUs</u>
Outstanding at January 1, 2015	969,544
Granted	401,368
Vested and issued	(160,608)
Forfeited	(24,505)
Outstanding at June 30, 2015	<u>1,185,799</u>

Restricted Shares

Restricted shares generally vest over one year; however, 200,000 restricted shares granted during the year ended December 31, 2011 vest in equal amounts over a five-year period commencing in 2012.

Expense recognized for the three and six month periods ended June 30, 2015 was \$132 and \$261, respectively (2014 – \$127 and \$277). As at June 30, 2015, the total remaining unrecognized compensation cost related to restricted shares amounted to approximately \$574 (2014 – \$570), which will be amortized over the remaining vesting periods.

The following table summarizes restricted share activity during the period:

	<u>Number of Restricted Shares</u>
Outstanding at January 1, 2015	118,000
Granted	38,000
Vested	(78,000)
Outstanding at June 30, 2015	<u>78,000</u>

Stock Options

During the six month period ended June 30, 2015, 30,000 stock options were exercised (2014 – nil) for proceeds of \$219, and 25,000 stock options were cancelled (2014 – nil) in exchange for \$149. The Company has no stock options outstanding as at June 30, 2015.

Note 6. Net Income Per Share Attributable to Common Shareholders

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2015	2014	2015	2014
Net income attributable to common shareholders:				
Basic and diluted	\$ 16,412	\$ 571	\$ 30,046	\$ 21,612
Net income per share attributable to common shareholders:				
Basic	\$ 0.25	\$ 0.01	\$ 0.47	\$ 0.36
Diluted	\$ 0.25	\$ 0.01	\$ 0.46	\$ 0.36
Weighted average number of common shares outstanding:				
Basic ⁽¹⁾	64,395,918	63,915,377	64,336,515	59,835,098
Effect of dilutive instruments:				
PSUs	329,943	353,791	335,729	448,947
Restricted shares	55,111	64,588	71,736	67,391
Stock options	-	8,975	-	10,433
Diluted	64,780,972	64,342,731	64,743,980	60,361,869

(1) For the three and six month periods ended June 30, 2015, the basic weighted average number of shares excludes 78,000 restricted shares which have been issued, but have not vested as at June 30, 2015 (2014 – 118,000 restricted shares).

The calculation of diluted net income per share attributable to common shareholders does not assume the exercise of any instruments that would have an anti-dilutive effect on net income per share. There were no anti-dilutive instruments for the three and six month periods ended June 30, 2015 and 2014.

Note 7. Accumulated Other Comprehensive Income (Loss)

Changes in amounts included in accumulated other comprehensive income (loss) by component are as follows:

	Foreign Currency Translation Adjustments	Defined Benefit Pension and Post-Retirement Benefit Items	Unrealized Gains on Marketable Securities	Total
Balance December 31, 2014	\$ (33,268)	\$ (19,287)	\$ 114	\$ (52,441)
Other comprehensive income (loss) before reclassifications	(80,760)	-	(78)	(80,838)
Amounts reclassified from accumulated other comprehensive income (loss)	-	459	-	459
Other comprehensive income (loss), net of taxes	(80,760)	459	(78)	(80,379)
Balance June 30, 2015	\$ (114,028)	\$ (18,828)	\$ 36	\$ (132,820)

Note 8. Derivative Transactions

The Company is exposed to certain market risks relating to its ongoing business. The Company seeks to manage these risks through internal risk management policies as well as, from time to time, the use of derivatives. The derivatives are measured at fair value with changes in fair value immediately recognized in gain (loss) on derivative instruments in the Interim Consolidated Statement of Operations.

Interest Rate Derivative

During 2002, the Company entered into certain variable-to-fixed interest rate swaps in connection with the Stendal mill with respect to an aggregate maximum amount of approximately €612.6 million of the principal amount of the indebtedness under the Stendal mill's senior project finance facility, which was settled in November 2014. Under the remaining interest rate swaps, the Company pays a fixed rate and receives a floating rate with the derivative payments being calculated on a notional amount. As at June 30, 2015, the contract has a fair value of €20.9 million (\$23,343) of which €10.9 million (\$12,158) is classified as current within accounts payable and other and €10.0 million (\$11,185) is classified as a long-term liability in the Interim Consolidated Balance Sheet. The contract has an aggregate notional amount of €222.7 million, a fixed interest rate of 5.28% and matures in October 2017.

The Company has pledged as collateral cash in the amount of 67% of the fair value of the interest rate swap up to €8.5 million to the derivative counterparty. The calculation to determine the collateral is performed semi-annually, with the final calculation in October 2017. As at June 30, 2015, the collateral was €8.5 million (\$9,479). This cash has been classified as restricted cash in the Interim Consolidated Balance Sheet.

The interest rate derivative is with a bank that is part of a banking syndicate that holds the Stendal €75.0 million revolving credit facility and the Company does not anticipate non-performance by the bank.

Note 9. Financial Instruments

The fair value of financial instruments is summarized as follows:

	<u>June 30, 2015</u>		<u>December 31, 2014</u>	
	<u>Carrying Amount</u>	<u>Fair Value</u>	<u>Carrying Amount</u>	<u>Fair Value</u>
Cash and cash equivalents	\$ 90,867	\$ 90,867	\$ 53,172	\$ 53,172
Restricted cash	\$ 9,479	\$ 9,479	\$ 10,286	\$ 10,286
Marketable securities	\$ 119	\$ 119	\$ 196	\$ 196
Receivables	\$ 152,767	\$ 152,767	\$ 141,088	\$ 141,088
Accounts payable and other - excluding current portion of interest rate derivative liability	\$ 98,546	\$ 98,546	\$ 87,393	\$ 87,393
Debt	\$ 682,879	\$ 724,129	\$ 687,513	\$ 695,013
Interest rate derivative – liability	\$ 23,343	\$ 23,343	\$ 32,794	\$ 32,794

The carrying value of cash and cash equivalents, restricted cash and accounts payable and other approximates the fair value due to the immediate or short-term maturity of these financial instruments. The carrying value of receivables approximates the fair value due to their short-term nature and historical collectability. Marketable securities are recorded at fair value based on quoted prices in an active market. See the Fair Value Measurement and Disclosure section below for details on how the fair value of the interest rate derivative and debt was determined.

Note 9. Financial Instruments (continued)

Fair Value Measurement and Disclosure

The Company classified its marketable securities within Level 1 of the valuation hierarchy because quoted prices are available in an active market for the exchange-traded equities.

The Company's interest rate derivative is classified within Level 2 of the valuation hierarchy, as it is valued using internal models that use as their basis readily observable market inputs, such as forward interest rates and yield curves observable at specified intervals. The observable inputs reflect market data obtained from independent sources. The Company's debt is recognized at amortized cost. The fair value of debt classified as Level 2 reflects recent market transactions.

The following table presents a summary of the Company's outstanding financial instruments and their estimated fair values under the fair value hierarchy:

Description	Fair value measurements at June 30, 2015 using:			
	Level 1	Level 2	Level 3	Total
Assets				
Marketable securities	\$ 119	\$ -	\$ -	\$ 119
Liabilities				
Interest rate derivative	\$ -	\$ 23,343	\$ -	\$ 23,343
Debt	-	724,129	-	724,129
	<u>\$ -</u>	<u>\$ 747,472</u>	<u>\$ -</u>	<u>\$ 747,472</u>

Description	Fair value measurements at December 31, 2014 using:			
	Level 1	Level 2	Level 3	Total
Assets				
Marketable securities	\$ 196	\$ -	\$ -	\$ 196
Liabilities				
Interest rate derivative	\$ -	\$ 32,794	\$ -	\$ 32,794
Debt	-	682,912	12,101	695,013
	<u>\$ -</u>	<u>\$ 715,706</u>	<u>\$ 12,101</u>	<u>\$ 727,807</u>

Note 10. Commitments and Contingencies

(a) The Company is involved in legal actions and claims arising in the ordinary course of business. While the outcome of any legal actions and claims cannot be predicted with certainty, it is the opinion of management that the outcome of any such claim which is pending or threatened, either individually or on a combined basis, will not have a material adverse effect on the consolidated financial condition, results of operations or liquidity of the Company.

MERCER INTERNATIONAL INC.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)
(In thousands of U.S. dollars, except per share data)

Note 10. Commitments and Contingencies (continued)

- (b) In 2012, as a result of a regular tax field audit for the Stendal mill, German public authorities commenced a preliminary investigation into past managers of the mill relating to whether certain settlement amounts received by the Stendal mill in 2007, 2010 and 2011 from the main contractor under the Engineering, Procurement and Construction Contract for the construction of the Stendal mill should have reduced the assessment base for the original investment subsidies granted to the mill by German authorities. The payments were made by the contractor to the Stendal mill to settle certain warranty, performance and remediation claims that the Stendal mill made against the contractor after completion of mill construction in 2004. The amounts currently under review aggregate approximately €8.3 million (\$9,256). Investment subsidies received by the Stendal mill were generally based upon a percentage of the assessment base for subsidies of the mill. If the settlement payments received by the Stendal mill result in a reduction of the assessment base for subsidies under applicable German rules there could be a proportionate reduction in the investment subsidies and the difference could be repayable by the Stendal mill. The Stendal mill believes that it has properly recorded the settlement amounts received from the contractor and that the same do not reduce the assessment base for subsidies of the mill. While it is not reasonably possible to predict the outcome of the legal action and claim, it is the opinion of management that the outcome will not have a material adverse effect on the consolidated financial condition, results of operations or liquidity of the Company.
- (c) The Company is subject to regulations that require the handling and disposal of asbestos in a prescribed manner if a property undergoes a major renovation or demolition. Otherwise, the Company is not required to remove asbestos from its facilities. Generally asbestos is found on steam and condensate piping systems as well as certain cladding on buildings and in building insulation throughout older facilities. The Company's obligation for the proper removal and disposal of asbestos products from the Company's mills is a conditional asset retirement obligation. As a result of the longevity of the Company's mills, due in part to the maintenance procedures and the fact that the Company does not have plans for major changes that require the removal of asbestos, the timing of the asbestos removal is indeterminate. As a result, the Company is currently unable to reasonably estimate the fair value of its asbestos removal and disposal obligation. The Company will recognize a liability in the period in which sufficient information is available to reasonably estimate its fair value.

Note 11. Subsequent Event

In July 2015, the Company's Board of Directors approved a quarterly dividend of \$0.115 per share. Payment of the dividend will be made in October 2015 to all shareholders of record on September 28, 2015.

NON-GAAP FINANCIAL MEASURES

This quarterly report on Form 10-Q contains “non-GAAP financial measures”, that is, financial measures that either exclude or include amounts that are not excluded or included in the most directly comparable measure calculated and presented in accordance with the generally accepted accounting principles in the United States, referred to as “GAAP”. Specifically, we make use of the non-GAAP measure “Operating EBITDA”.

Operating EBITDA is defined as operating income (loss) plus depreciation and amortization and non-recurring capital asset impairment charges. We use Operating EBITDA as a benchmark measurement of our own operating results and as a benchmark relative to our competitors. We consider it to be a meaningful supplement to operating income as a performance measure primarily because depreciation expense and non-recurring capital asset impairment charges are not actual cash costs, and depreciation expense varies widely from company to company in a manner that we consider largely independent of the underlying cost efficiency of our operating facilities. In addition, we believe Operating EBITDA is commonly used by securities analysts, investors and other interested parties to evaluate our financial performance.

Operating EBITDA does not reflect the impact of a number of items that affect our net income (loss) attributable to common shareholders, including financing costs and the effect of derivative instruments. Operating EBITDA is not a measure of financial performance under GAAP, and should not be considered as an alternative to net income (loss) or income (loss) from operations as a measure of performance, or as an alternative to net cash from operating activities as a measure of liquidity.

Operating EBITDA has significant limitations as an analytical tool, and should not be considered in isolation, or as a substitute for analysis of our results as reported under GAAP. Some of these limitations are that Operating EBITDA does not reflect: (i) our cash expenditures, or future requirements, for capital expenditures or contractual commitments; (ii) changes in, or cash requirements for, working capital needs; (iii) the significant interest expense, or the cash requirements necessary to service interest or principal payments, on our outstanding debt; (iv) noncontrolling interests in our Stendal northern bleached softwood kraft, or “NBSK”, pulp mill operations prior to our acquisition of 100% of the economic interest of Stendal in September 2014; (v) the impact of realized or marked to market changes in our derivative positions, which can be substantial; and (vi) the impact of impairment charges against our investments or assets. Because of these limitations, Operating EBITDA should only be considered as a supplemental performance measure and should not be considered as a measure of liquidity or cash available to us to invest in the growth of our business. Because all companies do not calculate Operating EBITDA in the same manner, Operating EBITDA as calculated by us may differ from Operating EBITDA or EBITDA as calculated by other companies. We compensate for these limitations by using Operating EBITDA as a supplemental measure of our performance and by relying primarily on our GAAP financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

In this document: (i) unless the context otherwise requires, references to “we”, “our”, “us”, the “Company” or “Mercer” mean Mercer International Inc. and its subsidiaries; (ii) references to “Mercer Inc.” mean the Company excluding its subsidiaries; (iii) information is provided as of June 30, 2015, unless otherwise stated; (iv) all references to “\$” mean U.S. dollars, which is our reporting currency, unless otherwise stated; (v) “€” refers to euros and “C\$” refers to Canadian dollars; (vi) “ADMTs” refers to air-dried metric tonnes; and (vii) “MWh” refers to megawatt hours.

Results of Operations

General

We operate three northern bleached softwood kraft, referred to as “NBSK”, pulp mills, being our Rosenthal and Stendal mills located in Germany and our Celgar mill located in Western Canada. We have a consolidated annual production capacity of approximately 1.5 million ADMTs.

The following discussion and analysis of our results of operations and financial condition for the three and six months ended June 30, 2015 should be read in conjunction with our interim consolidated financial statements and related notes included in this quarterly report, as well as our most recent annual report on Form 10-K for the fiscal year ended December 31, 2014 filed with the Securities and Exchange Commission, referred to as the “SEC”.

Current Market Environment

As our operating costs are primarily incurred in euros and Canadian dollars and our principal product, NBSK pulp, is quoted in U.S. dollars, our business and operating margins materially benefit from the recent strengthening of the U.S. dollar. Such benefit is generally partially offset as a strengthening of the U.S. dollar puts downward pressure on pulp prices, since a stronger U.S. dollar increases costs to our European and Asian customers. Our energy and chemical sales are made in local currencies and, as a result, our realizations decline in U.S. dollar terms when the U.S. dollar strengthens.

During the current quarter of 2015, the U.S. dollar was 19% and 11% stronger against the euro and Canadian dollar, respectively, compared to the same quarter of 2014. This in large part contributed to an 11% reduction in our costs and expenses in the second quarter of 2015, compared to the same quarter of 2014.

During the second quarter of 2015, pulp list prices were essentially flat in Europe and North America and increased in China, compared to the end of the prior quarter of 2015. At the end of the current quarter, list prices in Europe, North America and China were approximately \$855, \$980 and \$670 per ADMT, respectively.

Currently, the NBSK pulp market is generally balanced with world producer inventories at about 29 days' supply.

Looking forward for the balance of 2015, we currently expect generally stable pricing in Europe and some modest downward pricing pressure in China in the near term and improving prices in the later part of the year.

Summary Financial Highlights

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
	(in thousands, other than per share amounts)			
Pulp revenues	\$ 246,126	\$ 259,482	\$ 480,783	\$ 537,988

(3) Average Federal Reserve Bank of New York noon spot rate over the reporting period.

Three Months Ended June 30, 2015 Compared to Three Months Ended June 30, 2014

Total revenues for the three months ended June 30, 2015 decreased by approximately 6% to \$266.9 million from \$285.2 million in the same quarter in 2014, primarily due to lower pulp sales realizations.

Pulp revenues in the three months ended June 30, 2015 decreased by approximately 5% to \$246.1 million from \$259.5 million in the same quarter of 2014, due to lower sales realizations, partially offset by a higher sales volume.

Energy and chemical revenues decreased by approximately 19% to \$20.8 million in the second quarter of 2015 from \$25.7 million in the same quarter of 2014, primarily due to the impact of a stronger U.S. dollar relative to the euro and Canadian dollar.

Pulp production increased marginally to 358,861 ADMTs in the current quarter from 353,803 ADMTs in the same quarter of 2014. In the second quarter of 2015, we had 11 days (approximately 20,600 ADMTs) of annual maintenance downtime, which was at our Stendal mill, compared to 12 days in the same quarter of 2014 and 14 days in the prior quarter of 2015. We estimate that such maintenance downtime in the current quarter adversely impacted our Operating EBITDA by approximately \$12.4 million, comprised of approximately \$8.6 million in direct out-of-pocket expenses and the balance in reduced production. Many of our competitors that report their financial results using International Financial Reporting Standards ("IFRS") capitalize their direct costs of maintenance shutdowns.

Our Rosenthal mill's annual maintenance shutdown is scheduled for 14 days in the third quarter of 2015 and our Stendal mill has an additional two-day maintenance shutdown scheduled for the fourth quarter of 2015.

Pulp sales volumes increased by approximately 4% to 371,350 ADMTs in the current quarter from 356,755 ADMTs in the same quarter of 2014, primarily due to stronger demand from China, partially offset by lower sales to North America and Europe.

In the current quarter of 2015, list prices for NBSK pulp declined from the same quarter of 2014, largely as a result of the strengthening of the U.S. dollar. Average list prices for NBSK pulp in Europe were approximately \$855 per ADMT in the second quarter of 2015, compared to approximately \$925 per ADMT in the same quarter of 2014. Average list prices for NBSK pulp in North America and China were approximately \$980 per ADMT and \$670 per ADMT, respectively, in the second quarter of 2015, compared to approximately \$1,030 per ADMT and \$730 per ADMT, respectively, in the same quarter of 2014.

Average pulp sales realizations decreased by approximately 9% to \$657 per ADMT in the second quarter of 2015 from approximately \$720 per ADMT in the same quarter last year, primarily due to lower list prices.

Costs and expenses in the current quarter decreased by approximately 11% to \$233.4 million from \$263.2 million in the second quarter of 2014, primarily due to the impact of a stronger U.S. dollar on our euro and Canadian dollar denominated expenses, partially offset by higher sales volumes. During the current quarter, the U.S. dollar was 19% and 11% stronger against the euro and Canadian dollar, respectively, compared to the same quarter of 2014.

In the second quarter of 2015, operating depreciation and amortization decreased by approximately 17% to \$16.4 million from \$19.8 million in the same quarter of 2014, due to the impact of a stronger U.S. dollar relative to the euro and Canadian dollar.

Selling, general and administrative expenses decreased to \$11.7 million in the second quarter of 2015 from \$12.9 million in the same quarter of 2014.

Transportation costs decreased by approximately 10% to \$20.1 million in the current quarter from \$22.3 million in the same quarter of 2014 due to the stronger U.S. dollar.

On average, our overall per unit fiber costs in the current quarter decreased by approximately 15% from the same quarter of 2014, primarily as a result of the strengthening of the U.S. dollar versus the euro and the Canadian dollar more than offsetting increases in local currency per unit fiber prices. In the current quarter, in euro terms, average fiber prices in Germany were approximately 4% higher than the comparative quarter as a result of lower sawmilling activity in the current quarter. In the current quarter, in Canadian dollar terms, average fiber prices for our Celgar mill were approximately 18% higher than the comparative quarter due to increased demand for chips from coastal mills in the Celgar mill's fiber procurement region.

In the second quarter of 2015, our operating income increased by approximately 52% to \$33.5 million from \$22.0 million in the same quarter of 2014, primarily due to the positive impact of a stronger U.S. dollar relative to the euro and Canadian dollar, partially offset by lower pulp sales realizations.

Interest expense in the current quarter decreased to \$13.5 million from \$17.2 million in the same quarter of 2014.

In the current quarter, as a result of a slight weakening of the U.S. dollar versus the euro during the quarter, we recorded a non-cash gain on the foreign exchange translation of intercompany debt between Mercer Inc. and its wholly-owned subsidiaries which increased our net income by \$2.2 million, or \$0.03 per share.

In the current quarter, we recorded a derivative gain of \$0.2 million on the mark to market adjustment of our Stendal mill's interest rate derivative, compared to a non-cash derivative gain of \$2.5 million in the same quarter of 2014.

The noncontrolling shareholder's interest in the Stendal mill's net income, which was eliminated in the third quarter of 2014, was \$2.2 million in the second quarter of last year.

During the second quarter of 2015, we recorded income tax expense of \$5.9 million, compared to \$4.6 million in the same quarter of 2014, due to higher taxable income for our German mills.

We reported net income attributable to common shareholders of \$16.4 million, or \$0.25 per basic and diluted share, for the second quarter of 2015, compared to \$0.6 million, or \$0.01 per basic and diluted share, in the same period of 2014.

In the second quarter of 2015, Operating EBITDA increased by approximately 19% to \$50.0 million from \$41.9 million in the same quarter of 2014, primarily as a result of a stronger U.S. dollar versus the euro and Canadian dollar which in large part contributed to an 11% reduction in costs and expenses, partially offset by lower pulp sales realizations.

Six Months Ended June 30, 2015 Compared to Six Months Ended June 30, 2014

Total revenues for the six months ended June 30, 2015 decreased by approximately 11% to \$524.5 million from \$590.9 million in the same period in 2014, primarily due to lower pulp sales realizations.

Pulp revenues in the six months ended June 30, 2015 decreased by approximately 11% to \$480.8 million from \$538.0 million in the same period of 2014, due to both lower sales realizations and sales volumes.

Energy and chemical revenues decreased by approximately 17% to \$43.7 million in the first half of 2015 from \$52.9 million in the same period of 2014, primarily due to the impact of a stronger U.S. dollar relative to the euro and Canadian dollar.

Pulp production decreased by approximately 2% to 721,490 ADMTs in the first half of 2015 from 735,588 ADMTs in the same period of 2014. In the first half of 2015, we had an aggregate of 25 days (approximately 39,800 ADMTs) of annual maintenance downtime, comprised of 14 days at our Celgar mill and 11 days at our Stendal mill. In the first half of 2014, we had 12 days of annual maintenance downtime. We estimate that such maintenance downtime in the first half of 2015 adversely impacted our Operating EBITDA by approximately \$30.7 million, comprised of approximately \$20.0 million in direct out-of-pocket expenses and the balance in reduced production. Many of our competitors that report their financial results using IFRS capitalize their direct costs of maintenance shutdowns.

Our Rosenthal mill's annual maintenance shutdown is scheduled for 14 days in the third quarter of 2015 and our Stendal mill has an additional two-day maintenance shutdown scheduled for the fourth quarter of 2015.

Pulp sales volumes decreased by approximately 2% to 721,041 ADMTs in the first half of 2015 from 738,110 ADMTs in the same period of 2014, primarily due to weaker demand from North America, partially offset by higher demand in China and Europe.

Average list prices for NBSK pulp in Europe were approximately \$871 per ADMT in the first half of 2015, compared to approximately \$923 per ADMT in the same period of 2014. Average list prices for NBSK pulp in North America and China were approximately \$988 per ADMT and \$667 per ADMT, respectively, in the first half of 2015, compared to approximately \$1,023 per ADMT and \$743 per ADMT, respectively, in the same period of 2014.

Average pulp sales realizations decreased by approximately 8% to \$661 per ADMT in the first half of 2015 from approximately \$722 per ADMT in the same period of 2014, primarily due to lower list prices.

Costs and expenses in the first half of 2015 decreased by approximately 16% to \$447.0 million from \$529.6 million in the same period of 2014, primarily due to the impact of a stronger U.S. dollar on our euro and Canadian dollar denominated expenses and lower sales volumes, partially offset by higher annual maintenance costs. During the first half of 2015, the U.S. dollar was 19% and 11% stronger against the euro and Canadian dollar, respectively, compared to the same period of 2014.

In the first half of 2015, operating depreciation and amortization decreased by approximately 15% to \$33.7 million from \$39.5 million in the same period of 2014, due to the impact of a stronger U.S. dollar relative to the euro and Canadian dollar.

Selling, general and administrative expenses decreased slightly to \$23.1 million in the first half of 2015 from \$23.4 million in the same period of 2014.

Transportation costs decreased by approximately 15% to \$37.4 million in the first half of 2015 from \$44.2 million in the same period of 2014 due to the stronger U.S. dollar.

On average, our overall per unit fiber costs in the first half of 2015 decreased by approximately 17% from the same period of 2014, primarily as a result of the strengthening of the U.S. dollar versus the euro and the Canadian dollar more than offsetting increases in our Celgar mill's per unit fiber prices. In the first half of 2015, in euro terms, average fiber prices in Germany were marginally lower compared to the first half of 2014 as a result of a balanced wood market. In the first half of 2015, in Canadian dollar terms, average fiber prices for our Celgar mill were approximately 16% higher than the comparative period due to increased demand for chips from coastal mills in the Celgar mill's fiber procurement region.

In the first half of 2015, our operating income increased by approximately 26% to \$77.5 million from \$61.3 million in the same period of 2014, primarily due to the positive impact of a stronger U.S. dollar relative to the euro and Canadian dollar on our costs and expenses, partially offset by lower pulp sales realizations and higher costs associated with annual maintenance downtime.

Interest expense in the first half of 2015 decreased to \$27.4 million from \$34.6 million in the same period of 2014.

In the first half of 2015, as a result of the strengthening of the U.S. dollar versus the euro, we recorded a non-cash loss on the foreign exchange translation of intercompany debt between Mercer Inc. and its wholly-owned subsidiaries which reduced our net income by \$4.4 million, or \$0.07 per share.

In the first half of 2015, we recorded a derivative loss of \$0.4 million on the mark to market adjustment of our Stendal mill's interest rate derivative, compared to a non-cash derivative gain of \$5.8 million in the same period of 2014.

The noncontrolling shareholder's interest in the Stendal mill's net income, which was eliminated in the third quarter of 2014, was \$4.3 million in the six months ended June 30, 2014.

During the first half of 2015, we recorded income tax expense of \$15.2 million, compared to \$6.4 million in the same period of 2014, due to higher taxable income for our German mills.

We reported net income attributable to common shareholders of \$30.0 million, or \$0.47 per basic and \$0.46 per diluted share, for the first half of 2015, compared to \$21.6 million, or \$0.36 per basic and diluted share, in the same period of 2014.

In the first half of 2015, Operating EBITDA increased by approximately 10% to \$111.4 million from \$100.9 million in the same period of 2014, primarily as a result of the strengthening of the U.S. dollar versus the euro and Canadian dollar which in large part contributed to a 16% reduction in our costs and expenses, partially offset by lower pulp sales realizations and higher annual maintenance costs.

Liquidity and Capital Resources

The following table is a summary of selected financial information as at the dates indicated:

	June 30, 2015	December 31, 2014
	(in thousands)	
Financial Position		
Cash and cash equivalents	\$ 90,867	\$ 53,172
Working capital	\$ 305,569	\$ 262,332
Total assets	\$ 1,267,848	\$ 1,326,807
Long-term liabilities	\$ 766,075	\$ 772,424
Total equity	\$ 389,975	\$ 438,880

As at June 30, 2015, our cash and cash equivalents had increased to \$90.9 million from \$53.2 million at the end of 2014 and our working capital had increased to \$305.6 million from \$262.3 million at the end of 2014.

As at June 30, 2015, we had approximately \$113.1 million available under our revolving credit facilities.

During the first half of 2015, as a result of the strengthening of the U.S. dollar versus the euro and the Canadian dollar, we recorded a non-cash reduction in the carrying value of our net assets, consisting primarily of our fixed assets, denominated in euros and Canadian dollars. This non-cash reduction of approximately \$80.8 million does not affect our net income, Operating EBITDA or cash flows but is reflected in our other comprehensive income (loss) and as a reduction to our total equity.

Sources and Uses of Funds

Our principal sources of funds are cash flows from operations, cash and cash equivalents on hand and our revolving credit facilities. Our principal uses of funds consist of operating expenditures, capital expenditures and interest payments on our outstanding 7.0% Senior Notes due 2019 and 7.75% Senior Notes due 2022.

Debt Covenants

Certain of our long-term obligations contain various financial tests and covenants customary to these types of arrangements. See our annual report on Form 10-K for the year ended December 31, 2014.

As at June 30, 2015, we were in full compliance with all of the covenants of our indebtedness.

Cash Flow Analysis

Cash Flows from Operating Activities. We operate in a cyclical industry and our operating cash flows vary accordingly. Our principal operating cash expenditures are for labor, fiber and chemicals.

Working capital levels fluctuate throughout the year and are affected by maintenance downtime, changing sales patterns, seasonality and the timing of receivables and revenues and the payment of payables and expenses.

Cash provided by operating activities was \$70.3 million in the first half of 2015 and \$81.0 million in the comparative period of 2014. An increase in accounts payable and accrued expenses provided cash of \$18.1 million in the first half of 2015, compared to \$14.2 million in the same period of 2014. An increase in inventories, excluding non-cash items, used cash of \$5.6 million in the first half of 2015, compared to a decrease in inventories providing cash of \$5.3 million in the same period of 2014. An increase in receivables used cash of \$22.7 million in the first half of 2015, compared to \$2.8 million in the same period of 2014.

Cash Flows from Investing Activities. Investing activities in the first half of 2015 used cash of \$20.4 million, compared to \$14.9 million in the same period of 2014. In the six months ended June 30, 2015, capital expenditures and costs associated with the implementation of the enterprise resource planning system used cash of \$20.7 million, compared to \$15.2 million in the same period of 2014.

Cash Flows from Financing Activities. In the first half of 2015, financing activities used cash of \$8.9 million, compared to providing cash of \$27.3 million in the same period of 2014. In the first half of 2015, the redemption of the payment-in-kind note issued in respect of the purchase of the minority interest in our Stendal mill in 2014 used cash of \$10.8 million and a scheduled payment in respect of our interest rate derivative used cash of \$7.0 million. In the first half of 2014, proceeds from our offering of shares of our common stock provided cash of \$53.9 million, principal repayments under our Stendal mill's prior credit facilities, which were paid out in the fourth quarter of 2014, used cash of \$29.8 million and proceeds of government grants provided cash of \$4.1 million.

Capital Commitments and Future Liquidity

Based upon the current level of operations and our current expectations for future periods in light of the current economic environment, and in particular, current and expected pulp pricing and foreign exchange rates, we believe that cash flow from operations and available cash, together with available borrowings, will be adequate to meet our liquidity needs in the next 12 months.

We currently have no material commitments to acquire assets or operating businesses. We anticipate that there may be acquisitions or commitments to capital projects in the future. To achieve the long-term goals of expanding our assets and earnings, additional capital resources may be required. Depending on the size of a transaction or project, the capital resources that will be required can be substantial. The necessary resources will be generated from cash flow from operations, cash on hand, borrowing against our assets or the issuance of securities.

Off-Balance Sheet Arrangements

At June 30, 2015, we did not have any off-balance sheet arrangements (as defined in Item 303(a)(4)(ii) of Regulation S-K).

Contractual Obligations and Commitments

There were no material changes outside the ordinary course to any of our material contractual obligations during the six months ended June 30, 2015.

We entered into a new two-year collective bargaining agreement with the unionized employees at our Rosenthal mill that was to take effect July 1, 2015 and provides for, among other things, an annual 2.4% increase in pay for such employees.

Foreign Currency

As we hold certain assets and liabilities in euros and Canadian dollars and the majority of our expenditures are denominated in euros or Canadian dollars, our consolidated financial results are subject to foreign currency exchange rate fluctuations.

We translate foreign denominated assets and liabilities into U.S. dollars at the rate of exchange on the balance sheet date. Equity accounts are translated using historical exchange rates. Unrealized gains or losses from these translations are recorded in other comprehensive income (loss) and do not affect our net earnings.

In the first half of 2015, as a result of the strengthening of the U.S. dollar versus the euro and Canadian dollar, we recorded a non-cash reduction in the carrying value of our net assets, consisting primarily of our fixed assets, denominated in euros and Canadian dollars. As a result, our accumulated other comprehensive loss increased to \$132.8 million.

Based upon the exchange rate at June 30, 2015, the U.S. dollar has strengthened by approximately 19% and 14% in value against the euro and the Canadian dollar, respectively, since June 30, 2014. See “Quantitative and Qualitative Disclosures about Market Risk”.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect both the amount and the timing of the recording of assets, liabilities, revenues, and expenses in the consolidated financial statements and accompanying note disclosures. Our management routinely makes judgments and estimates about the effects of matters that are inherently uncertain. As the number of variables and assumptions affecting the probable future resolution of the uncertainties increases, these judgments become even more subjective and complex.

Our significant accounting policies are disclosed in Note 1 to our annual report on Form 10-K for the fiscal year ended December 31, 2014. While all of the significant accounting policies are important to the consolidated financial statements, some of these policies may be viewed as having a high degree of judgment. On an ongoing basis, using currently available information, management reviews its estimates, including those related to the accounting for, among other things, pension and other post-retirement benefit obligations, deferred income taxes (valuation allowance), depreciation and amortization, future cash flows associated with impairment testing for long-lived assets, intercompany loans of a long-term investment nature, legal liabilities and contingencies. Actual results could differ materially from these estimates, and changes in these estimates are recorded when known.

We have identified certain accounting policies that are the most important to the portrayal of our current financial condition and results of operations.

For information about both our significant and critical accounting policies, see our annual report on Form 10-K for the fiscal year ended December 31, 2014.

Cautionary Statement Regarding Forward-Looking Information

The statements in this report that are not reported financial results or other historical information are “forward-looking statements” within the meaning of the *Private Securities Litigation Reform Act of 1995*, as amended.

Generally, forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “seeks”, “estimates”, or words of similar meaning, or future or conditional verbs, such as “will”, “should”, “could”, or “may”, although not all forward-looking statements contain these identifying words. Forward-looking statements are based on expectations, forecasts and assumptions by our management and involve a number of risks, uncertainties and other factors, many of which are beyond our control, that could cause actual conditions, events or results to differ significantly from those described in the forward-looking statements. These factors include, but are not limited to, the following:

- the highly cyclical nature of our business;
- our level of indebtedness could negatively impact our financial condition, results of operations and liquidity;
- a weakening of the global economy could adversely affect our business and financial results and have a material adverse effect on our liquidity and capital resources;
- cyclical fluctuations in the price and supply of our raw materials could adversely affect our business;
- we operate in highly competitive markets;
- we are exposed to currency exchange rate and interest rate fluctuations;
- we periodically use derivatives to manage certain risks which has caused significant fluctuations in our operating results;
- we are subject to extensive environmental regulation and we could have environmental liabilities at our facilities;
- our business is subject to risks associated with climate change and social and government responses thereto;
- our new enterprise resource planning system may cost more than expected, be delayed, fail to perform as planned and interrupt operational transactions during and following the implementation, which could adversely affect our operations and results of operations;
- our operations require substantial capital and we may be unable to maintain adequate capital resources to provide for such requirements;
- future acquisitions may result in additional risks and uncertainties in our business;
- changes in credit ratings issued by nationally recognized statistical rating organizations could adversely affect our cost of financing and have an adverse effect on the market price of our securities;
- we are subject to risks related to our employees;
- we rely on German federal and state government grants and participate in German and European statutory energy programs;
- we are dependent on key personnel;
- we may experience material disruptions to our production (including as a result of, among other things, planned and unplanned maintenance shutdowns);

- if our long-lived assets become impaired, we may be required to record non-cash impairment that could have a material impact on our results of operations;
- we may incur losses as a result of unforeseen or catastrophic events, including the emergence of a pandemic, terrorist attacks or natural disasters;
- our insurance coverage may not be adequate;
- we rely on third parties for transportation services;
- failures or security breaches of our information technology systems could disrupt our operations and negatively impact our business;
- the price of our common stock may be volatile; and
- a small number of our shareholders could significantly influence our business.

Given these uncertainties, you should not place undue reliance on our forward-looking statements. The forgoing review of important factors is not exhaustive or necessarily in order of importance and should be read in conjunction with the risks and assumptions including those set forth in reports and other documents we have filed with or furnished to the SEC, including in our annual report on Form 10-K for the fiscal year ended December 31, 2014. We advise you that these cautionary remarks expressly qualify in their entirety all forward-looking statements attributable to us or persons acting on our behalf. Unless required by law, we do not assume any obligation to update forward-looking statements based on unanticipated events or changed expectations. However, you should carefully review the reports and other documents we file from time to time with the SEC.

Cyclical Nature of Business

Revenues

The pulp business is highly cyclical in nature and markets are characterized by periods of supply and demand imbalance, which in turn affects prices. Pulp markets are highly competitive and are sensitive to cyclical changes in the global economy, industry capacity and foreign exchange rates, all of which can have a significant influence on selling prices and our operating results. The length and magnitude of industry cycles have varied over time but generally reflect changes in macro-economic conditions and levels of industry capacity. Pulp is a commodity that is generally available from other producers. Because commodity products have few distinguishing qualities from producer to producer, competition is generally based upon price, which is generally determined by supply relative to demand.

Industry capacity can fluctuate as changing industry conditions can influence producers to idle production capacity or permanently close mills. In addition, to avoid substantial cash costs in idling or closing a mill, some producers will choose to operate at a loss, sometimes even a cash loss, which can prolong weak pricing environments due to oversupply. Oversupply of our products can also result from producers introducing new capacity in response to favorable pricing trends. Certain integrated pulp and paper producers have the ability to discontinue paper production by idling their paper machines and selling their NBSK pulp production on the market if market conditions, prices and trends warrant such actions.

Demand for pulp has historically been determined primarily by general global macroeconomic conditions and has been closely tied to overall business activity. NBSK pulp prices can fluctuate widely over time. Between 2005 and 2014, European list prices for NBSK pulp have fluctuated between a low of approximately \$575 per ADMT in 2009 to a high of \$1,030 per ADMT in 2011.

In 2012, pulp prices declined sharply, primarily due to economic uncertainty in Europe and credit tightening in China. Economic uncertainty in Europe and China, respectively, impacted both demand and prices. At the end of 2012, list prices were approximately \$810 per ADMT in Europe, \$870 per ADMT in North America and \$655 per ADMT in China. At the end of 2013, list prices had increased to \$905 per ADMT in Europe, \$990 per ADMT in North America and \$750 per ADMT in China. In 2014, list prices were on average approximately 7% higher than 2013. During the six months ended June 30, 2015, pulp prices decreased from the end of 2014. As at June 30, 2015, list prices for NBSK pulp were approximately \$855 per ADMT in Europe, \$980 per ADMT in North America and \$670 per ADMT in China.

A producer's actual sales price realizations are list prices net of customer discounts, rebates and other selling concessions. Over the last three years, these have increased as producers compete for customers and sales. Our sales price realizations may also be affected by NBSK price movements between the order and shipment dates.

Accordingly, prices for pulp are driven by many factors outside our control and we have little influence over the timing and extent of price changes, which are often volatile. Prices may fall below our cash production costs, requiring us to either incur short-term losses on product sales or cease production at one or more of our mills. Therefore, our profitability depends on managing our cost structure, particularly our costs for raw materials which represent a significant component of our operating costs and can fluctuate based upon factors beyond our control. If the prices of our products decline, or if prices for our raw materials increase, or both, our results of operations and cash flows could be materially adversely affected.

Costs

Our production costs are influenced by the availability and cost of raw materials, energy and labor and our plant efficiencies and productivity. Our main raw material is fiber in the form of wood chips and pulp logs. Wood chip and pulp log costs are primarily affected by the supply of, and demand for, lumber and pulp, which are both cyclical, and, to a lesser extent, by increasing demand from renewable energy producers. Higher fiber costs could affect our margins if we are unable to pass along price increases to our pulp customers or purchasers of surplus energy. The state of lumber markets affects both the amount of sawmill residuals, such as chips, produced as a by-product of lumber and the level of timber harvesting, which provides us with pulp logs. Production costs also depend on the total volume of production. Lower operating rates during periods of cyclically low demand result in higher average production costs and lower margins.

Currency

The majority of our sales are in products quoted in U.S. dollars while most of our operating costs and expenses are in euros, other than those of the Celgar mill, which are primarily incurred in Canadian dollars. Our results of operations and financial condition are reported in U.S. dollars. As a result, our expenses are reduced by an increase in the value of the U.S. dollar relative to the euro and to the Canadian dollar. Such a shift in the U.S. dollar relative to the euro and the Canadian dollar improves our operating margins and the cash flow available to fund our operations. Conversely, a weakening of the U.S. dollar to the euro and the Canadian dollar reduces our operating margins and the cash flow available to fund our operations. This could have a material adverse effect on our business, financial condition, results of operations and cash flows.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risks from changes in interest rates and foreign currency exchange rates, particularly the exchange rates between the U.S. dollar and each of the euro and the Canadian dollar. Changes in these rates may affect our results of operations and financial condition and, consequently, our fair value. We seek to manage these risks through internal risk management policies as well as the periodic use of derivatives. We may use derivatives to reduce or limit our exposure to interest rate and currency risks. We may also use derivatives to reduce or limit our exposure to fluctuations in pulp prices. We use derivatives to reduce our potential losses or to augment our potential gains, depending on our management's perception of future economic events and developments. These types of derivatives are generally highly speculative in nature. They are also very volatile as they are highly leveraged given that margin requirements are relatively low in proportion to notional amounts.

Many of our strategies, including the use of derivatives, and the types of derivatives selected by us, are based on historical trading patterns and correlations and our management's expectations of future events. However, these strategies may not be effective in all market environments or against all types of risks. Unexpected market developments may affect our risk management strategies during this time and unanticipated developments could impact our risk management strategies in the future. If any of the variety of instruments and strategies we utilize is not effective, we may incur significant losses.

All of our derivatives are marked to market at the end of each reporting period and all unrealized gains and losses are recognized in earnings for a reporting period. We determine market valuations based primarily upon observable inputs, including applicable yield curves.

During the six months ended June 30, 2015, we recorded a derivative loss of approximately \$0.4 million on our outstanding interest rate derivative, compared to a non-cash derivative gain of \$5.8 million in the same period of 2014.

We are also subject to some energy price risk, primarily for the natural gas and electricity that our operations purchase. Our electricity price risks are mitigated by the ability of all of our mills to produce renewable energy.

For additional information, please refer to Part II, Item 7A. Quantitative and Qualitative Disclosures about Market Risk included in our annual report on Form 10-K for the fiscal year ended December 31, 2014.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management, with the participation of our principal executive officer and principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15 (e) and 15d-15(e) under the *Securities Exchange Act of 1934*, as amended, referred to as the “Exchange Act”), as of the end of the period covered by this report. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports we file or submit under the Exchange Act is accumulated and communicated to management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. Based on such evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by us in the reports that we file or submit under the Exchange Act.

It should be noted that any system of controls is based in part upon certain assumptions designed to obtain reasonable (and not absolute) assurance as to its effectiveness and there can be no assurance that any design will succeed in achieving its stated goals.

Changes in Internal Controls

There have been no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are subject to routine litigation incidental to our business, including that which is described in our latest annual report on Form 10-K for the fiscal year ended December 31, 2014. We do not believe that the outcome of such litigation will have a material adverse effect on our business or financial condition.

ITEM 1A. RISK FACTORS

As of June 30, 2015, there have been no material changes to the factors disclosed in Item 1A. Risk Factors in our latest annual report on Form 10-K for the fiscal year ended December 31, 2014.

ITEM 2. UNREGISTERED SALE OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

None.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit No.	Description
31.1	Section 302 Certification of Chief Executive Officer
31.2	Section 302 Certification of Chief Financial Officer
32.1*	Section 906 Certification of Chief Executive Officer
32.2*	Section 906 Certification of Chief Financial Officer
101	The following financial statements from the Company's Form 10-Q for the fiscal period ended June 30, 2015, formatted in XBRL: (i) Interim Consolidated Balance Sheets; (ii) Interim Consolidated Statements of Operations; (iii) Interim Consolidated Statements of Retained Earnings; (iv) Interim Consolidated Statements of Comprehensive Income (Loss); (v) Interim Consolidated Statements of Cash Flows; and (vi) Notes to Interim Consolidated Financial Statements.

* In accordance with Release No. 33-8212 of the SEC, these Certifications: (i) are "furnished" to the SEC and are not "filed" for the purposes of liability under the Securities Exchange Act of 1934, as amended; and (ii) are not to be subject to automatic incorporation by reference into any of the Company's registration statements filed under the Securities Act of 1933, as amended, for the purposes of liability thereunder or any offering memorandum, unless the Company specifically incorporates them by reference therein.

CERTIFICATION OF PERIODIC REPORT

I, David M. Gandossi, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Mercer International Inc. (the “Registrant”);
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the Registrant as of, and for, the periods presented in this report;
4. The Registrant’s other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the Registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the Registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the Registrant’s disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the Registrant’s internal control over financial reporting that occurred during the Registrant’s most recent fiscal quarter (the Registrant’s fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the Registrant’s internal control over financial reporting; and
5. The Registrant’s other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the Registrant’s auditors and the audit committee of the Registrant’s board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the Registrant’s ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the Registrant’s internal control over financial reporting.
